EDUCATION

Smt. Kashibai Navale College of Engineering   **2020– 2024**
B.E. - Computer Science and Engineering - ***CGPA - 8.72***   *Pune, Maharashtra*

SKILLS

Programming Languages: JavaScript, TypeScript, Java, Python, HTML, CSS
Libraries and Frameworks: React.js, Next.js, Node.js, Express
State Management: Redux, Redux Toolkit, Redux Toolkit Query, Recoil
UI Libraries: Tailwind CSS, Chakra UI, Shadcn UI, Magic UI, Accernity UI, Material UI
Databases: Mongo DB, Mongoose ODM, Redis, PostgreSQL, Drizzle ORM
Tools: Git, Github, Docker

PROJECTS

E-learning Website with AI support for Doubt Assistance | Github Live ⬈   Dec 2023 - Feb 2024

- **Description:** Developed a full-stack E-learning website enabling tutors to upload courses and students to purchase them. The platform includes features such as AI-driven doubt support, real-time analytics, and DRM protection for video content.
- **Front-end:** TypeScript, Next.js, Tailwind CSS, Material UI, Recharts, Redux Toolkit Query, NextAuth.
- **Back-end:** Express, Nodemailer, EJS, Cloudinary, Multer, Stripe, MongoDB, Mongoose, Redis, Socket.io, Bcrypt, JWT.
- **Video to Text:** Streamlit, FFMPEG, AssemblyAI, Docker, AWS.
- Integrated **Gemini AI** assistant trained on course transcripts for accurate doubt resolution.
- Implemented **Real-time analytics dashboard** and **notifications** on student course purchase.
- Added **Digital Media Rights(DMR)** encryption to protect video from piracy using ***vdocipher.***
- **Collaboration:** Worked alongside a team member who focused on building and deploying the ***video-to-text application*** using Docker, AWS, ffmpeg and Assembly AI.

Fullstack Social Media Application | Github Live ⬈   July 2024 - Aug 2024

- **Description:** Developed a full-stack Threads app clone with real-time features and a responsive design, utilizing the MERN stack along with additional technologies.
- **Technologies Used:** React.js, Express.js, MongoDB, Mongoose, Socket.io, Chakra UI, Cloudinary, Recoil.
- Implemented secure **authentication** and **authorization** using **JSON Web Tokens** (**JWT**).
- Enabled users to create, delete, like/unlike, and comment on posts.
- Enabled users to follow/unfollow each other and **freeze** their accounts.
- Built a **real-time chat** application with **image support**, seen/unseen message status, and notification sounds using ***Socket.io***.
- Utilized ***Recoil*** for efficient and scalable **state management**.

AI Mock Interview SaaS | Github Live ⬈   July 2023 - Aug 2024

- **Description:** Developed a Software as a Service web app for AI-driven mock interviews tailored to candidates' roles, job descriptions, and experience.
- **Technologies Used:** TypeScript, Next.js, Tailwind, Shadcn, PostgreSQL, Drizzle ORM, Stripe, Gemini AI, Clerk.
- Implemented AI-generated mock interview questions and feedback using **Gemini AI**
- Integrated ***Clerk*** for **authentication** and ***Stripe*** for **upgrading** to a premium version.
