SUMMARY

Full-Stack Software Engineer with **2+ years of experience** building and shipping production web, mobile, and AI-powered products. Experienced in owning features from **technical design through implementation, debugging, review, and production delivery**, using **AI-assisted development** to move faster while retaining ownership of engineering decisions and final quality

WORK EXPERIENCE

Full Stack Developer

Apr 2025 – Present

- CA Monk
- Course Marketing Platform — Next.js 16, Sanity CMS
- Led a team to migrate CA Monk's **established course marketing platform**, serving **~300K** monthly visits and supporting **₹X Cr+ (US\$XXXXK+)** in cumulative platform revenue, from **Graphy to Next.js 16 and Sanity CMS**, eliminating dependency on the third-party landing-page platform.
 - Architected a high-efficiency **caching and event-driven revalidation layer** using Next.js Cache Components/PPR, Sanity webhooks, and Upstash Redis, reducing **Sanity API requests by 95%+** while maintaining **sub-second response times**.
 - Optimized high-traffic landing pages to **85+ PageSpeed performance and 95+ SEO scores**, implementing **SEO and Generative Engine Optimization (GEO)** through JSON-LD structured data, dynamic metadata, sitemaps, and crawlability improvements; integrated **Sentry** for production observability.

- Mobile App — Capacitor, React, TypeScript
- Led development and launch of CA Monk's **cross-platform Android/iOS application** from scratch using Capacitor, React, and TypeScript, achieving **90%+ code reuse** from the existing web ecosystem while maintaining feature parity across career tools.
 - Built native integrations for **file upload/download, camera and microphone access, app lifecycle handling, and deep-link payment reconciliation**, and automated multi-flavor Android builds for internal testing and production distribution on the **Google Play Store**.

- AI Resume Builder & Career Tools — React, Node.js, PostgreSQL, Vercel AI SDK
- Built full-stack features for an **AI Resume Builder, ATS Resume Scorer, and Cover Letter suite** using React, Redux Toolkit, TanStack Query, Node.js/Express, PostgreSQL/Prisma, Puppeteer, and the Vercel AI SDK.
 - Engineered a multi-stage **PDF/DOC/DOCX resume ingestion pipeline** with fast local text extraction, Docling/OCR fallbacks, heuristic quality validation, and AI-based parsing into structured resume sections using **OpenAI/Azure OpenAI** models.
 - Implemented **prompt-injection safeguards, strict JSON-schema validation, and fallback logic** to improve AI output reliability; developed a Puppeteer-based **one-page resume rendering mode** for ATS-friendly PDF exports.

Frontend Developer Intern

Sep 2024 – Apr 2025

- CA Monk
- Built responsive production interfaces for the **Resume Scorer, Salary Estimator, Articleship Scorer, User Dashboard, and Home Page** using React, TypeScript, Redux Toolkit, TanStack Query, Tailwind CSS, Shadcn UI, and Zod.
 - Drove a frontend performance overhaul through **route-level code splitting, tree shaking, Gzip compression, asset preloading, and rendering optimizations**, improving Lighthouse performance from **56 to 85+** and Core Web Vitals.
 - Integrated **PostHog analytics** to track authenticated user journeys and conversion/drop-off funnels across **6+ career tools**, and implemented recovery handling for stale dynamic-import failures after deployments.

SKILLS

Programming:

TypeScript, JavaScript (ES6+), HTML5, CSS3

Frontend & Mobile:

React.js, Next.js, Redux Toolkit, Zustand, TanStack Query, Tailwind CSS, shadcn/ui, Capacitor.js

Backend & APIs:

Node.js, Express.js, NestJS, REST APIs, gRPC, Zod

AI & LLM:

Vercel AI SDK, OpenAI / Azure OpenAI, Langflow, Docling / OCR Pipelines

Databases & Caching:

PostgreSQL, MongoDB, Redis / Upstash, Prisma ORM, Drizzle ORM, Mongoose

Cloud, DevOps & Tooling:

AWS S3, Docker, Turborepo, CI/CD, Git, GitHub, Vite, Rollup

CMS, Payments & Observability:

Sanity CMS, Stripe, Razorpay, HDFC SmartGateway, Sentry, PostHog

Testing:

Playwright, Vitest, Jest

PROJECTS

- AI-Powered Learning Management System (LMS)
- Next.js 14, TypeScript, Node.js, MongoDB, Redis, Gemini
- Open Source · 27 GitHub Stars · 12 Forks
- Built a full-stack **AI-powered LMS and course-commerce platform** supporting course discovery, purchases, enrollments, reviews, student Q&A, instructor content management, and role-based administration.
 - Developed a **course-context AI assistant** using **Google Gemini and video transcripts**, enabling students to ask lesson-specific questions and generate summaries grounded in course content.
 - Engineered production-oriented capabilities including **Stripe payments, Redis caching, JWT authentication with refresh sessions, Socket.IO real-time notifications, DRM-protected video delivery, and instructor analytics** for courses, users, and orders.

EDUCATION

Bachelor of Engineering in Computer Science

2020 - 2024

Smt. Kashibai Navale College of Engineering
